

DSECT/DSEN Monthly Seminar Series

“Use of Spontaneous Report Data to Inform Drug Safety and Effectiveness: The RxISK Portal”

Presented by
Dr. Dee Mangin, MBChB, FRNZCGP, DPH

*Associate Professor, Dept. of Family Medicine, McMaster University
Associate Professor, Director of Research, University of Otago, Christchurch
David Braley & Nancy Gordon Chair in Family Medicine*

Thursday, May 26, 2016 at 3:00-4:00pm EDT

Online webinar (GoToWebinar*)

RSVP: <https://attendee.gotowebinar.com/register/3255355237364177156>

*Audio is VOIP - you must have a computer speaker or headset to hear the webinar

This presentation will discuss use of spontaneous reporting and patient reporting of adverse drug effects in informing drug safety. RxISK is a portal for patient direct reporting of, and information about, drug side effects. The data available includes patient direct reports to RxISK, and access to up to date data from the FDA and Health Canada spontaneous report datasets. The presentation will include an explanation and introduction to the data in RxISK, and how to use the website portal.

The ***Drug Safety and Effectiveness Cross-Disciplinary Training (DSECT) program*** and the ***Drug Safety and Effectiveness Network (DSEN)*** are presenting a monthly online seminar series for faculty, staff, trainees, decision-makers, and other stakeholders engaged in the field of drug safety and effectiveness.
